February 27, 1956

MONTHLY EGG PRODUCTION 1955

Egg production in the United States in 1955 amounted to 4,957 million dozen, a record high output—1 percent more than the revised estimates for 1954. Production has remained fairly steady during the last 5 years. An 11 percent increase in the rate of lay has more than offset a 9 percent decrease in layers since 1950.

Monthly estimates of egg production for the United States for 1946-55 and by States for 1955 are shown in this issue. The estimates 1950-55 have been revised after a review of the 1954 Census and other data not available at the time the original estimates were made. Revised estimates by States, 1950-54, will be released about March 23, 1956.
